

## Port Liberty New York Heavy Weight Corridor

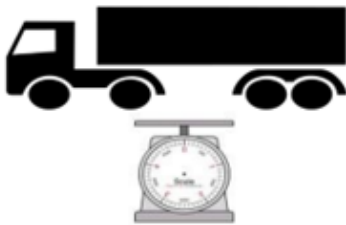

NYC DOT has implemented a rule change allowing 90,000lbs GWV loads to move from Port Liberty NY to/from the Goethals Bridge utilizing a New Jersey trip permit and at no additional cost.

Truckers using this route to cross the Goethals Bridge must possess a valid Annual Ocean Borne Containerized Cargo Multiple-trip permit from the New Jersey Department of Transportation and have it in their possession at the time of crossing.

Once a NJDOT annual permit is obtained, the trucker must also obtain a concurrent annual approval letter (at no additional cost) from the Port Authority of New York and New Jersey by submitting a request to [SIBOperations@panynj.gov](mailto:SIBOperations@panynj.gov). (Please include a copy of the valid NJDOT permit and allow 3-5 business days for processing).

Port Liberty NY is equipped to handle your heavy weight containers. If there are loads that exceed the 90,000lb GWV, we can get the load lightened or swung to domestic trailer at our on-sight warehouse dock.

### Heavy Weight Cargo Corridor

- Expands Road Weight limitation to 90,000 GWV
- Simplifies and removes cost of permit process
- Provide NJ annual permit to the PANYNJ Bridge Command
  - Email: [SIBOperations@panynj.gov](mailto:SIBOperations@panynj.gov)
